Cochrane IT Services

We have no Conflicts of Interest to declare.
Session plan

Managing the editorial process in RevMan Web

- View the latest version of a review in RevMan Web
- Find out which of your group's reviews are available in RevMan Web
- Understand the similarities and differences between reviews in RevMan Web and RevMan 5
- Edit and amend a review in RevMan Web
- Find and use the guidance and support available for RevMan Web users
Submit your questions and comments using the Questions panel.

Please raise your hand to be unmuted for verbal questions or comments.
Quick introductory poll

How would you rate your experience of working with RevMan Web?

A) I haven't looked at RevMan Web yet
B) I've looked at RevMan Web, but haven't worked with it
C) I've tried working on a practice review
D) I've used RevMan Web to edit a live Cochrane Review
Accessing a review in RevMan Web

• How to …
  • access a review in RevMan Web
  • understand how RevMan Web differs from RevMan 5
  • make a review available in RevMan Web
  • recognise the Archie properties and version history of reviews in RevMan Web
  • check in a version from RevMan Web
  • simultaneous editing and saving changes
  • search for reviews available in RevMan Web
  • amend author details for a review byline

• RevMan Web Knowledge Base
• Training reviews
Edit and amend a review in RevMan Web

- Tracked changes
- Search and find
- Find and replace
- Split screen
- Spell check
- Notes
- References
- Figures
- PRISMA
- Moving appendices
- Footnotes in Characteristics of studies tables
Reasons for choosing RevMan Web

- Avoids download and installation problems with RevMan 5
- Offline mode tabled for development
- Access from any device
- Easy to load large reviews
- Improvements being made all the time – continually evolving
Any questions?
What is new in RevMan Web and what is planned?

- Catching up with RevMan 5
- New features
- The RevMan Web roadmap
Catching up with RevMan 5

- Full-text view that allows reading the whole article AND find in all Text sections, Summary of Findings and Study characteristics (References and Risk of Bias to be added)
- Navigate easily between references and studies
- Validation report (60% completed; more rules released every week) (see https://documentation.cochrane.org/revman-kb/working-with-the-review/how-to-use-the-validation-report-in-the-review)
New features

Features with the aim to increase the quality of reviews and shorten the time to produce them.

- Study-centric data [pilot]
- Risk of Bias 2 [pilot]
- GRADEpro integration [launched last week]

Enabling new features mean you can no longer check out the review in RevMan 5.

Email support@cochrane.org if you want to enable these integrations or if you have any queries.
### RevMan Web Roadmap

#### Now
- GRADEpro integration
- Validation report
- Create figures without RevMan 5 dependency
- Edit and find risk of bias content in full-text view
- Edit and find reference content in full-text view

#### Next
- Blockers for RevMan 5 retirement
- Remove blockers due to publishing
- Risk of Bias 2 improvements
- Contrast level data [study-centric]
- Intervention lumping [study-centric]

#### Future
- Covidence integration
- Offline editing
- Network meta-analysis
- Related outcomes [study centric]
- Support for non-Cochrane reviews
- Support for non-intervention reviews
- Content strategy implications
