

Policy implementation

# Editorial policy update: rejecting Cochrane Reviews and the appeals process

**Bryony Urquhart and Anupa Shah**

With thanks to Liz Dooley, Miranda Cumpston,  
Dario Sambunjak and ME Support

28 November, 2017

Trusted evidence.  
Informed decisions.  
Better health.

# Introduction

1. Focus on policies:
  - Rejection
  - Appeal
2. Practical implementation of policies

The *Cochrane Editorial and Publishing Policy Resource* brings together Cochrane's editorial and publishing policies, as well as general information about the editorial and publishing processes, and the published products, including the Cochrane Library.

Cochrane organizational policies are available in the [Organizational info section of the Community site](#) and the [About us section of cochrane.org](#).

The Cochrane Editorial Unit welcomes feedback and suggestions for improvement. For queries relating to a specific section of the resource, please direct your query to the section editor listed at the end of the section. For general queries, please contact Harriet MacLehose ([hmaclehose@cochrane.org](mailto:hmaclehose@cochrane.org)), Senior Editor, [Cochrane Editorial Unit](#).

# Policy development process

# Rejection of Cochrane Reviews

- Rejection policy applicable to unpublished protocols and reviews
- Consistency across CRGs
- Transparency around decision making
- Provide clarity for authors

## Rejection policy in brief

- Drafts (reviews, and protocols and updates of reviews) can be rejected at any time.
- There is no guarantee of publication.
- Criteria for rejection include (but not restricted to) quality, timeliness, competence, ethics.
- Authors can publish rejected drafts elsewhere.
- CRGs can engage another author team to take on rejected title.
- Guidance on implementation, including recording rejections in Archie

# Example reasons for rejection

## 1. **Quality**

The CRG identified concerns with the draft review which are not satisfactorily addressed by the Authors

## 2. **Timeliness**

Authors cannot comply with agreed editorial timelines, and there is no reasonable explanation for the delay

## 3. **Competence**

Authors do not provide adequate responses to feedback from the CRG, including to peer reviewer comments and requests for progress reports.

## 4. **Research and publication ethics**

It comes to light that Author is employed by the manufacturer of the intervention.

## Rejection actions in Archie

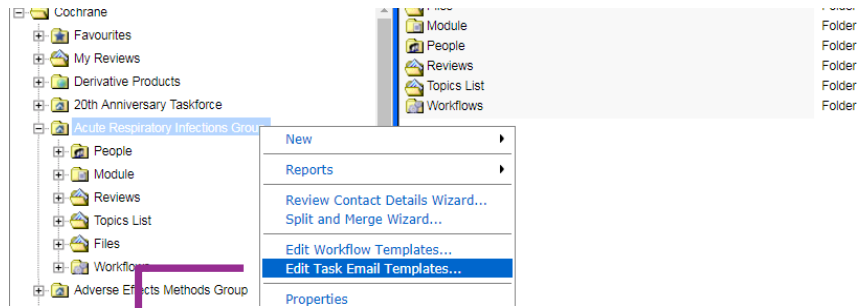

Once two CRG Editors (including the Co-ordinating Editor or delegate) agree to reject the Cochrane Review, three actions need to be taken:

1. Communicate the decision (workflow email templates)
2. Record the rejection in Archie
3. Abort the 'In Progress' workflow

# Communicating the rejection

1. Inform the authors of the decision via workflow email
  - Rejecting a review proposal (5 templates)
  - Rejecting a draft protocol (3 templates)
  - Rejecting a draft review (3 templates)
  - Rejecting a draft update of a review (3 templates)

Internet Explorer window: Edit Task Email Templates - Internet Explorer

# Recording rejections in Archie

2. Create a new Administrative note, using the Note Type: Editorial Management, to record the reason(s) that led to the rejection of the protocol/review. This should be a concise, factual description of what preceded the decision to reject.

► If the protocol/review was rejected for reasons specific to the Author team, add a factual Note to the Properties sheet of the relevant Person records in Archie.

3. Abort the 'In Progress' Workflow

4. Notify Editor in Chief

\*\*Consider making the unpublished Cochrane Review/update of a Cochrane Review available to a new author team.

# Take home message

- Reject early and communicate clearly
- Avoid spending editorial time on reviews that are not up to standard

# Appeals process

- Implement one process across all CRGs
- Clarity around decision-making
- Clarity for authors
- Consistency in appeals escalated to Editor in Chief
  - One appeal per Cochrane Review
  - Format of appeal (in writing)
  - CRG first, then can be escalated
  - Schedule of response times
  - EiC's decision is final

# Practical implementation of policies

- Look for announcements in the Reviews & Methods Digest
- Upcoming webinars:
  - Peer review policy & guidance
  - Plagiarism webinar
  - Retraction / withdrawing policy
  - Scientific misconduct policy
- Templates and implementation guidance
- A phase-in period, but implementation will be mandatory
- No structural changes to Archie (although improvements are planned for the future)
